

#ORGANEQUITYNOW

Let our legislators know what your uterus would say if it could speak. Decorate your uterus as you wish. Then cut it out along the outside line so you can bring your uterus to the statehouse with you!

ORGAN EQUITY NOW!

Organ equity is a movement to ensure that the uterus is given the same rights and protection under the law as all other organs in the human body.

THE UTERUS IS THE ONLY ORGAN IN THE HUMAN BODY THAT IS LEGISLATED.

The uterus is the one organ in the human body in which the government seeks to intervene between the person and the organ against a person's "right to privacy".

Organ equity seeks to:
Give the uterus the same healthcare rights as all other organs in the human body.

Allow people who have uteruses to make medical decisions about their uteruses with a medical professional without government interference or limitations as all other organs in the human body.

Allow people who have a uterus full ownership of their uterus.

Your Talking Points:

Cut along the dotted line and tape on the back of this uterus.

Therefore, if anyone has any questions, you have specific answers.
